

SA CHEAT SHEET

SURFAE AREA IS THE AMOUNT OF SPEACE COVERING THE OUTSIDE OF A 3-D SHAPE

3-D SHAPE	FORMULA:
Rectangular Prism 	$SA = 2(lw) + 2(wh) + 2(lh)$
Cube 	$SA = 6s^2$
Triangular Prism 	<p><i>Find Area of Each Face and then add them</i></p> <p>(*Remember the area of a triangle is $a = \frac{bh}{2}$) (*area of a rectangle is $a = lw$)</p>
Square Pyramid 	$SA = B + (n \times A)$ B= area of the base of the pyramid n= number of faces A= area of each triangular face <p>(*Remember the area of a triangle is $a = \frac{bh}{2}$) (*area of a square is $a = lw$ or $a = s^2$)</p>
Triangular Pyramid 	$SA = 4T$ T= the area of each equilateral triangle <p>(*Remember the area of a triangle is $a = \frac{bh}{2}$)</p>
